Portfolio: https://erzakurtaj.me/

LANGUAGES

Albanian: Native
English: TOEFL iBT 89/120, December 13 2025

TECHNICAL SKILLS

Programming Languages:
Python, JavaScript, TypeScript, C#, SQL

Web & Software Development:
React.js, FastAPI, Node.js, REST APIs, HTML, CSS, Tailwind CSS

Databases:
Microsoft SQL Server, PostgreSQL, MongoDB, Firebase

Cloud & DevOps:
AWS, Docker, Kubernetes, Jira, Git, GitHub Actions

Artificial Intelligence & Emerging Technologies:
Large Language Models (LLMs), AI Agents, LangChain, LangGraph, CrewAI, AutoGen, Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Workflow Automation

Software Engineering:
Agile Development, Scrum, Software Architecture, API Integration, Version Control, Full-Stack Development

Design & Product Development:
User-Centered Design, Digital Product Development, Requirements Analysis, Prototyping, Problem Solving

EDUCATION

RIINVEST COLLEGE | Prishtina, Kosovo

Bachelor of Science in Computer Science – Software Engineering

Specialization in Mobile Devices and Cloud Programming

October 2021 – September 2024

GPA: 8.28/10.00 | 180 ECTS | Bachelor thesis grade: 10/10

Relevant Coursework: Artificial Intelligence, Software Engineering, Algorithms and Data Structures, Database Systems, Global Cloud Applications, Web Programming, and Mobile Application Development.

WORK EXPERIENCE

SOFTWARE ENGINEER & AI SOLUTIONS DEVELOPER
SK TAX ADDISON (Remote, U.S.A)
October 2024 - Present

- Develop the functionality of a multi-agent AI platform for client companies; coordinate tasks with the business owner.
- Developed a hotel voice agent: book, modify and cancel reservations, food and room-service orders. Ran 35 internal test bookings, fixed the failures found and re-tested.
- Developed a social media manager agent: content creation per platform, ad monitoring and campaign creation, with human approval before publishing.
- Contributed to the dashboard (React, TypeScript, FastAPI) with role-based access for super admin, admin, business owner and employee; deploy and maintain it on AWS (EC2, S3).
- Integrate LLMs through AWS Bedrock and send platform emails with Amazon SES, applying prompt engineering to automate tasks identified with stakeholders.
- Manage the company's digital infrastructure, including email systems, web hosting environments, domain administration, and business software support. Address technical issues and maintain the systems that employees rely on for daily communication, coordination, and service delivery.
- Design, develop, and maintain company websites using WordPress, translating business requirements into functional web pages and interface improvements. Refine website structure, content presentation, and navigation to help users access information and interact with the company's services.

FULL-STACK DEVELOPER INTERN
GENPACT (Remote, U.S.A)
September 2025 – March 2026

- Completed a full-stack software engineering internship centred on collaborative web application development, contributing to the process of translating project requirements into functional features. Gained practical experience connecting user interfaces with application logic while working within a shared development environment.
- Collaborated within an Agile team to develop the Community Help Platform, a web application connecting individuals seeking assistance with local volunteers (Next.js, TypeScript, FastAPI, PostgreSQL, Docker).
- Built the volunteer flow end to end: browse and search open requests (filters, sorting, distance) apply with the requester notified, and track applications on a dashboard.
- Built the requester flow: accept volunteers up to the number needed (others rejected automatically), notify everyone involved, and mark requests as completed.

RESEARCH INTERESTS

Human-Centered Design

User Experience and User Interface Design

Human-AI Interaction

Accessibility and Inclusive Technologies

TRAINING & CERTIFICATES

Artificial Intelligence & Large Language Models:

Databricks Partner Training – Financial Services Industry Specialization for Gen AI & LLM (2026)

Databricks Partner Training – Healthcare & Life Sciences Industry Specialization for Gen AI & LLM (2026)

Agentic AI Training Course – EDUREKA (2026)

LLM Prompt Engineering – EDUREKA (2026)

Software Engineering & Web Development:

Web Application Development Professional – ICT Kosovo (2024)

FastAPI: The Complete Course (Beginner to Advanced) – Udemy (2026)

The Ultimate React Course: React, Next.js, Redux & More – Udemy (2025)

Data & Database Systems:

The Complete SQL Bootcamp – Udemy (2025)

DevOps & Development Operations

GitHub Actions: The Complete Guide (CI/CD) – Udemy (2026)

FRONTEND DEVELOPER

KosovaOutsource, Prishtina, Kosovo

July 2024 – December 2024

- Developed and maintained responsive web applications using React.js.
- Built sections of the ModelKos Academy platform for educational programmes, services, and information.
- Implemented language switching and adaptive interface themes to support different user preferences.
- Collaborated with team members to translate client requirements into frontend features.

FULL-STACK DEVELOPER INTERN

Tectigon Academy, Prishtina, Kosovo

May 2024 – July 2024

- Completed a full-stack development programme covering web technologies and collaborative software projects.
- Developed frontend and backend components for a mental health support platform, a fashion e-commerce application, and an art information website.
- Implemented responsive interfaces, authentication, data management, shopping carts, and course registration features across training projects.

ACADEMIC & APPLIED PROJECTS

Bachelor Thesis: Development of an Online Food Ordering Application

Riinvest College | September 2024

- Developed a full-stack food ordering application addressing restaurant order handling and customer access to menus.
- Used Agile/Scrum, MVC architecture, Microsoft SQL Server, C#, JavaScript, HTML, and CSS.
- Implemented authentication, menu management, order creation, customer ratings, and administrative order management.

Community Help Platform (CHP)

GENPACT Full-Stack Development Capstone Project | 2026

- Developed help request submission and volunteer matching by location, skills, and availability, alongside participation workflows.
- Contributed to communication, search, and feedback features for coordinating requests and volunteer participation.

Passionis: Fashion E-Commerce with AI Stylist | Independent project | 2026

- Implemented a full-stack shop (Node.js, Express, PostgreSQL) with JWT authentication, cart, order management and transactional email (Brevo).
- Integrated an LLM-based fashion consultant (Groq API) that returns natural-language advice with matching product cards from a parallel catalogue search.
- Designed the user interface and interaction, including mood-based browsing, so customers can shop by how they want to feel and not only by category
